2022 ²	-15.05	-16.48	..	<=5	<=5	5,073	..	n/a	11.23

Partial Years

¹ Returns for 2017 are from 01/31/2017 to 12/31/2017

² Returns for 2022 are from 12/31/2021 to 10/31/2022

Period	Composite Gross Return (%)	Composite Net Return (%)	Benchmark Return (%)
1 Year	4.297	2.236	0.000
3 Year	9.971	7.807	0.000
Since Inception	5.555	3.471	0.000

Description

The **Global Sector Strategy (GSS)** is a Logical-Invest model investment strategy. The Strategy seeks the optimal allocation between a variety of global equity sectors and the long duration U.S. Treasury market. Global equity sectors have historically presented a well-defined, stable, and long-lasting period along the broad cyclical economic development of global markets, which allows the Strategy to see investment returns that outperform various market sectors even as the US equity market is under pressure. Simultaneously, the Strategy benefits from the long-term inverse correlation between equity markets and long duration bonds while capturing value from the money flows into safe havens such as US. Treasuries during crisis times.

Calculation Methodology

The returns presented are asset-weighted and were calculated by geometrically linking the monthly sub-periods of each year presented. Portfolios which were not included during the entirety of any month were not included in the presented strategy performance for that month. A time-weighted rate of return was used to calculate all periods presented. The presented net returns were calculated by reducing 1/12th of the annual 2% management fee from gross monthly strategy returns. Returns are further reduced by trading commissions and do not reflect the reinvestment of dividends. The 2% management fee applied does not include fees charged by FTA for services other than investment management.

Disclosure

Performance presented reflects the returns of actual portfolios invested in the GSS strategy and includes only portfolios managed by FTA which are entirely allocated to this strategy. Variances in holdings may have occurred across portfolios invested in this strategy, due to timing of cash flow additions and liquidations or other client-specific constraints, which may have resulted in performance for individual portfolios that is different than that of the returns presented. New accounts invested in this strategy may be invested similarly but not identically to the investments of the portfolios which were used to calculate the presented performance.

All investments carry with them the possibility of loss.
