Partial Years

¹ Returns for 2021 are from 07/31/2021 to 12/31/2021

² Returns for 2022 are from 12/31/2021 to 10/31/2022

Period	Composite Gross Return (%)	Composite Net Return (%)	Benchmark Return (%)
Since Inception	8.265	7.379	0.000

Description

The **Sector Growth Strategy** (SGS) invests in strong U.S. equity sectors, in particular, 11 sector ETFs and an ETF that tracks Barclays US Aggregate bond ETF. Momentum indicators are utilized for each sector to determine the composition of the strategy. When a given sector momentum indicator is bullish, the sector ETF is held. When a given sector momentum indicator is bearish, the sector ETF is dropped and replaced with a Barclays Aggregate Bond ETF.

Calculation Methodology

The returns presented are asset-weighted and were calculated by geometrically linking the monthly sub-periods of each year presented. Portfolios which were not included during the entirety of any month were not included in the presented strategy performance for that month. A time-weighted rate of return was used to calculate all periods presented. The presented net returns were calculated by reducing $1/12^{\text{th}}$ of the annual 2% management fee from gross monthly strategy returns. Returns are further reduced by trading commissions and do not reflect the reinvestment of dividends. The 2% management fee applied does not include fees charged by FTA for services other than investment management.

Disclosure

Performance presented reflects the returns of actual portfolios invested in the SGS strategy and includes only portfolios managed by FTA which are entirely allocated to this strategy. Variances in holdings may have occurred across portfolios invested in this strategy, due to timing of cash flow additions and liquidations or other client-specific constraints, which may have resulted in performance for individual portfolios that is different than that of the returns presented. New accounts invested in this strategy may be invested similarly but not identically to the investments of the portfolios which were used to calculate the presented performance.

All investments carry with them the possibility of loss.
